

Alfa Romeo Sprint Maintenance Repair Service Manual

Alfa Romeo All-Alloy Twin Cam Companion provides an excellent technical and historical overview of the Giulietta and Giulia families of small sporting roadsters, coupes and sedans. If an Alfa Romeo had one of the all-alloy four-cylinder engines and reached production, it's covered in the Alfa Romeo All-Alloy Twin Cam Companion. That means that even after the Giulia name was dropped - partly in the United States - the many variants of Duetto, GTV, Berlina and Alfetta are covered, from 1954 through 1994 when the last including the four-cylinder Spiders-were sold in the United States. When it came to Alfa Romeos, author Pat Braden was an enthusiast's enthusiast. Pat didn't just write about Alfas - he lived and breathed Alfas. From the mid-1950s when he first owned a Giulietta Sprint until his death in August 2002, Pat had owned scores of Alfa Romeos, ranging from a 6C 1750GTC and an 8C 1900s, Giuliettas, Giulias and countless later models. Alfa models are discussed according to history, engine, chassis and track. Without being a repair manual, this book contains important technical information needed to understand and enjoy one of the cars, as well as to perform many minor repair, maintenance, and service tasks. Braden starts with a brief overview of Alfa Romeo followed by a look at Alfa's presence in America. He also explores the major models of coupe, spider and berlina that used the four-cylinder, as well as the limited production variants. Of course, he also gives much attention to that mighty engine itself. He explains the design and history of the engine, as well as exploring trouble spots and offering extensive advice and tips. Additional technical sections focus on the fuel system, transmission, brakes and chassis, not to mention overall restoration. Alfa Romeo Twin Cam Companion is a key to getting the absolute maximum benefit and enjoyment out of Alfa.

The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

There is something special about Alfa Romeo cars which can't be defined precisely but is, perhaps, best described as a vitality that creates a symbiosis between driver and machine: a oneness that no other marque seems to replicate. Alfa's Berlinas have always tended to be overshadowed by their spotlight-grabbing Coupé and Spider siblings, but enthusiasts with family car needs have always known that any saloon/sedan with the famous Alfa Romeo badge would deliver pure driving pleasure in equal measure. Here is the full story of Alfa's quirky but characterful Berlinas, from their beginnings in the early 1900s through to the start of a new millennium. Not only does the book describe and picture every model, it also contains useful information on restoring classic Alfa Romeos and details of marque specialists.

The chaise-longue by Le Corbusier, the radio by Rams, the chair by Eames – designers make things into cult objects and become icons themselves. But who knows which coupé was designed by Frua, which limousine by Engel, which station wagon by Opron? For a long time, car design was considered to be anonymous, the designers stood in the shadow of the perception of the design, even though their designs can be found on the roads in millions. This richly illustrated book captures the origin of a profession and maps the development of car design based on a comprehensive introduction and the career biographies of over 200 selected designers who contributed to the design of cars and many different associated products in the USA, Europe, and Japan between 1900 and 2000.

After a period of post-war austerity, in 1957 Alfa Romeo decided it was time to re-enter the market for luxury/executive class new range designed for the growing number and prosperity of potential customers. Thus, the first models in the new 2000 series followed by the 2600 series in 1962. That they were not hugely successful, although some 18,540 were manufactured between 1966, can be attributed to a number of factors, principally cost. Largely ignored for many years, these cars are now recognized as a significant element in Alfa Romeo's history and this book is a valuable record of their story. Richly illustrated with over 200 color and black & white photographs, this book introduces the history of the company and its early designs; describes the early Berlina convertible and Sprint coupe, and their development into the 2600 series; details the evolution of the 1900-based engine into the 2600 engine; provides a history of the SZ Sprint Zagato; includes information on prototypes, show specials, specification tables, schemes and production numbers and, finally, includes a chapter on owning a 2000 or 2600.
