Chemical Kinetics Practice Problems And Practice Kinetics Problems - Department of Chemistry

General Chemistry II Jasperse Kinetics. Extra Practice Problems General Types/Groups of problems: Rates of Change in Chemical Reactions p1 First Order Rate Law Calculations P9 The look of

concentration/time graphs p2 Reaction Energy Diagrams, Activation Energy, Transition States... P10

CHAPTER TWELVE CHEMICAL KINETICS Questions 9.

The rate of a chemical reaction varies with time. Consider the general reaction: $A \rightarrow \text{Products}$ where rate = If we graph $[A]$ vs. t , it would roughly look like the dark line in the following plot. An instantaneous rate is the slope of a tangent line to the graph of $[A]$ vs. t . We can determine the Practice Problems Chemical Kinetics: Rates and Mechanisms of Chemical Reactions 1. State two
