*The
GETPIVOTDATA
function
returns
visible data
from a
PivotTable. In
this example,*

`=GETPIVOTDATA (`
`"Sales",A3)`
returns the
total sales
amount from a
PivotTable:
Syntax. `GETPIV`
`OTDATA (data_fi`
`eld,`
`pivot_table,`
`[field1,`
`item1, field2,`

item2], ...)

The

GETPIVOTDATA

function

syntax has the

following

arguments:

Refresh

PivotTable

data - Excel

Under Choose

the data that

Page 4/134

you want to
analyze,
select Select
a table or
range. In
Table/Range ,
verify the
cell range.
Under Choose
where you want
the PivotTable
report to be

*placed ,
select New
worksheet to
place the
PivotTable in
a new
worksheet or
Existing
worksheet and
then select
the location
you want the*

PivotTable to
appear.

Source for a Pivot Table

Excel ignores any filters you have applied using commands on the Filter submenu of the Data tab. To create a Pivot Table from filtered data, use the Advanced Filter command to extract a range of

data to another worksheet location and base the Pivot Table on the extracted range.

need to do the following steps: Before we get started, we first want to show you the data for the pivot table. In this example, the data is found on... Highlight the cell where you'd like to create the pivot

table. In this example, we've selected cell ...

A pivot table can summarize data into categories using functions such as SUM, MAX, MIN, AVERAGE, COUNT, as well as other Excel

functions. You can even display pivot table data as a percentage of the grand total for the data being examined.

Excel Sample Data for Testing and Examples

Scroll down to the end of the sample data table; Press Shift, and click at the end of the last number in the table, to select all the data; Press Ctrl + C to copy the

data; Paste it into an Excel workbook, for use in your own tests. Create an Excel Table. After you paste the sample data into Excel, you can format it as a named Excel table. You can also connect to external

data sources such as SQL Server tables, SQL Server Analysis Services cubes, Azure Marketplace, Office Data Connection (.odc) files, XML files, Access databases, and text files to create PivotTables,

or use existing PivotTables to create new tables. Note: The screen shots in this article were taken in Excel 2016.

MS Excel 2016: How to Create a Pivot Table Also, Excel 2016 supports analyzing

Page 130/134

data from multiple related tables on a worksheet (referred to as a Data Model). If the data in new pivot table you're creating is to be analyzed along with another existing pivot table, be sure to select the Add This Data to the Data Model check box.
